## Synopsis

This Project is a graphical user interface for controlling the orchestration service as well as plotting system statistics of the ARM Juno Development platform.

## Compatibility

This is the main Compatibility section, listing all devices that are supported by Orchestration Studio.

- Windows PC

## Requirements

- Windows 10 [.Net Framework 4.5]
- Windows 8.1 [.Net Framework 4.5]
- Visual Studio 2015 [Development / Compile]

## Installation

Unzip and open the project using the Microsoft Visual Studio 2015 or just execute the application found in /Executables. This version can be used either on Windows OSes only.

## API

none

## Usage

Before using this application, make sure you have installed the orchestration shared library and the orchestration service.

1. Connect to the ARM Juno Platform through the Connection Manager.
2. Execute the orchestration service
3. Assign some applications
4. Execute the applications

## Examples

none

## Contributing

One of the easiest ways to contribute is to participate in discussions and discuss issues. You can also contribute by submitting pull requests with code changes. Please log a new issue in the appropriate section [Issues] or by e-mail. The best way to get your bug fixed is to be as detailed as you can be about the problem. Providing a minimal project with steps to reproduce the problem is ideal.

Here are questions you can answer before you file a bug to make sure you're not missing any important information.

1. Did you read the documentation?
2. Did you include the command you executed in the issue?
3. What are the EXACT steps to reproduce this problem?
4. What package versions are you using?
